9. UNITED STATES TAX CONSIDERATIONS

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

EXAMPLES

THE EXAMPLES PRESENTED BELOW ARE FOR ILLUSTRATIVE PURPOSES ONLY.

For the purposes of each Example:

- (i) the Issue Price is 100 per cent. (100%) of the Aggregate Nominal Amount and the Calculation Amount is EUR 1,000;
- (ii) the Autocall Level is 100 per cent. (100%) of the Asset Initial Price, the Barrier Level is 60 per cent. (60%) of the Asset Initial Price and the Trigger Level is 100 per cent. (100%) of the Asset Initial Price.

AUTOMATIC EARLY EXERCISE

Example 1 – Automatic Early Exercise: *The Reference Price of the Underlying Asset on any Autocall Observation Date is greater than or equal to the Autocall Level. For such Autocall Observation Date, "N" is deemed to be equal to 73.*

In this Example, the Certificates will be exercised on the Automatic Early Redemption Date immediately following such Autocall Observation Date and the Automatic Early Exercise Amount payable per Certificate (of the Nominal Amount) will be an amount in the Settlement Currency equal to the Autocall Event Amount for such Valuation Date, i.e., EUR 1,048 (being equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the *sum* of (a) 1.04, *plus* (b) the *product* of (I) 0.04, *multiplied* by (II) the *quotient* of (A) N, *divided* by (B) 365).

Example 2 – no Automatic Early Exercise: *The Reference Price of the Underlying Asset on any Autocall Observation Date is less than the Autocall Level.*

In this Example, the Certificates will not be redeemed on the Automatic Early Redemption Date immediately following such Autocall Observation Date.

SETTLEMENT AMOUNT

Example 3 – Positive Scenario:

The Certificates have not been exercised on an Automatic Early Redemption Date and the Final Closing Price in respect of the Underlying Asset is 100 per cent. (100%) or more of the Asset Initial Price.

The Settlement Amount payable per Certificate (of the Nominal Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) 1.1985753, i.e., EUR 1,198.5753.

Example 4 – Neutral Scenario:

The Certificates have not been exercised on an Automatic Early Redemption Date and the Final Closing Price in respect of the Underlying Asset is 60 per cent. (60%) or more of the Asset Initial Price but less than 100 per cent. (100%) of the Asset Initial Price.

The Settlement Amount payable per Certificate (of the Nominal Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the Calculation Amount, i.e., EUR 1,000.

Example 5 – Negative Scenario:

The Certificates have not been exercised on an Automatic Early Redemption Date and the Final Closing Price in respect of the Underlying Asset is 59 per cent. (59%) of the Asset Initial Price.

The Settlement Amount payable per Certificate (of the Nominal Amount) on the Maturity Date will be 59 per cent. (59%) of the Calculation Amount, i.e., EUR 590. **In this Example, an investor who purchased the Certificates at the Issue Price will sustain a substantial loss of the amount originally invested in the Certificates.**

Example 5 – Negative Scenario:

The Certificates have not been exercised on an Automatic Early Redemption Date and the Final Closing Price in respect of the Underlying Asset is zero per cent. (0%) of the Asset Initial Price.

The Settlement Amount payable per Certificate (of the Nominal Amount) on the Maturity Date will be zero per cent. (0%) of the Calculation Amount, i.e., zero. **In this Example, an investor will sustain a total loss of the amount originally invested in the Certificates.**

SECTION D – RISKS								
D.2	Key risks that are specific to the Issuer	<p>The payment of any amount due on the Securities is subject to our credit risk as well as the credit risk of the Guarantor. The Securities are our unsecured obligations, and the Guaranty thereof is an unsecured obligation of the Guarantor. Neither the Securities nor the Guaranty are bank deposits, and neither are insured or guaranteed by the UK Financial Services Compensation Scheme, the Jersey Depositors Compensation Scheme, the U.S. Federal Deposit Insurance Corporation, the U.S. Deposit Insurance Fund or any other government or governmental or private agency or deposit protection scheme in any jurisdiction. The value of and return on your Securities will be subject to our credit risk and that of the Guarantor and to changes in the market's view of our creditworthiness and that of the Guarantor.</p> <p>References in Elements B.12 and B.19 (B.12) above to the "prospects" and "financial or trading position" of the Issuer and Guarantor (as applicable), are specifically to their respective ability to meet their full payment obligations under the Securities (in the case of GSFCI) or Guaranty (in the case of GSG) in a timely manner. Material information about the Issuer's and the Guarantor's respective financial condition and prospects is included in each of the Issuer's and the Guarantor's annual and interim reports. You should be aware, however, that each of the key risks highlighted below could have a material adverse effect</p>						

		<p>on the Issuer's and the Guarantor's businesses, operations, financial and trading position and prospects, which, in turn, could have a material adverse effect on the return investors receive on the Securities.</p> <p>The Issuer and the Guarantor are subject to a number of key risks of the Group:</p> <ul style="list-style-type: none"> • The Group's businesses have been and may continue to be adversely affected by conditions in the global financial markets and economic conditions generally. • The Group's businesses and those of its clients are subject to extensive and pervasive regulation around the world. • The Group's businesses have been and may be adversely affected by declining asset values. This is particularly true for those businesses in which it has net "long" positions, receives fees based on the value of assets managed, or receives or posts collateral. • The Group's businesses have been and may be adversely affected by disruptions in the credit markets, including reduced access to credit and higher costs of obtaining credit. • The Group's market-making activities have been and may be affected by changes in the levels of market volatility. • The Group's investment banking, client execution, asset management and wealth management businesses have been adversely affected and may in the future be adversely affected by market uncertainty or lack of confidence among investors and CEOs due to general declines in economic activity and other unfavourable economic, geopolitical or market conditions. • The Group's asset management and wealth management business may be affected by the poor investment performance of its investment products or a client preference for products other than those which the Group offers or for products that generate lower fees. • The Group may incur losses as a result of ineffective risk management processes and strategies. • The Group's liquidity, profitability and businesses may be adversely affected by an inability to access the debt capital markets or to sell assets or by a reduction in its credit ratings or by an increase in its credit spreads. • The Group faces enhanced risks as new business initiatives and acquisitions lead the Group to engage in new activities, transact with a broader array of clients and counterparties and expose the Group to new asset classes and new markets. • A failure in the Group's operational systems or infrastructure, or those of third parties, as well as human error, malfeasance or other misconduct, could impair the Group's liquidity, disrupt the Group's businesses, result in the disclosure of confidential information, damage the Group's reputation and cause losses. • A failure to protect the Group's computer systems, networks and information, and the Group's clients' information, against cyber attacks and similar threats could impair the Group's ability to conduct the Group's businesses, result in the disclosure, theft or destruction of confidential information, damage the Group's reputation and cause losses. • GSG is a holding company and is dependent for liquidity on payments from its subsidiaries, many of which are subject to restrictions. • The application of regulatory strategies and requirements in the U.S. and non-U.S. jurisdictions to facilitate the orderly resolution of large financial institutions could create greater risk of loss for GSG's security holders. • The application of GSG's proposed resolution strategy could result in greater losses for GSG's security holders. • The Group's businesses, profitability and liquidity may be adversely affected by Brexit. • The Group's businesses, profitability and liquidity may be adversely affected by deterioration in the credit quality of, or defaults by, third parties who owe the Group
--	--	---

		<p>money, securities or other assets or whose securities or obligations it holds.</p> <ul style="list-style-type: none"> • Concentration of risk increases the potential for significant losses in the Group's market-making, underwriting, investing and financing activities. • The financial services industry is both highly competitive and interrelated. • A failure to appropriately identify and address potential conflicts of interest could adversely affect the Group's businesses. • The Group's results have been and may in the future be adversely affected by the composition of its client base. • Derivative transactions and delayed settlements may expose the Group to unexpected risk and potential losses. • Certain of the Group's businesses, funding and financial products may be adversely affected by changes in or the discontinuance of Interbank Offered Rates (IBORs), in particular LIBOR. • Certain of the Group's businesses and its funding may be adversely affected by changes in other reference rates, currencies, indexes, baskets or ETFs to which products the Group offers or funding that the Group raises are linked. • The Group's businesses may be adversely affected if it is unable to hire and retain qualified employees. • The Group may be adversely affected by increased governmental and regulatory scrutiny or negative publicity. • Substantial civil or criminal liability or significant regulatory action against the Group could have material adverse financial effects or cause significant reputational harm, which in turn could seriously harm the Group's business prospects. • The growth of electronic trading and the introduction of new trading technology may adversely affect the Group's business and may increase competition. • In conducting its businesses around the world, the Group is subject to political, economic, legal, operational and other risks that are inherent in operating in many countries. • The Group's commodities activities, particularly its physical commodities activities, subject the Group to extensive regulation and involve certain potential risks, including environmental, reputational and other risks that may expose it to significant liabilities and costs. • The Group may incur losses as a result of unforeseen or catastrophic events, including the emergence of a pandemic, terrorist attacks, extreme weather events or other natural disasters. • Climate change concerns could disrupt our businesses, affect client activity levels and creditworthiness and damage the Group's reputation. • GSFCI does not carry out any operating business activity other than issuing securities and is largely reliant on payment obligations owed to it by its affiliates to fund its obligations under the Securities.
D.6	Key risks that are specific to the Securities	<ul style="list-style-type: none"> • Your capital is at risk. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, or have other consequences which cannot be predicted. • If any specified currency disruption event has occurred which is material to our payment obligations under the Securities, then the forthcoming payment date shall be postponed. If such event continues on the specified cut-off date, we may make payment of an equivalent amount in U.S. dollars. <p><i>Risks associated with Securities linked to underlying asset(s):</i></p> <ul style="list-style-type: none"> • The value of and return on the Securities depends on the performance of such underlying asset(s), which may be subject to unpredictable change over time. • Past performance of an underlying asset is not indicative of future performance. • You will not have any rights of ownership in the underlying asset(s), and our obligations under the Securities to you are not secured by any assets. • Following a disruption event, the valuation of the underlying asset(s) may be postponed and/or valued by us (as Calculation Agent) in our discretion. • Following the occurrence of certain extraordinary events in relation to the underlying asset(s) or in relation to index linked securities, following the occurrence of an index adjustment event, depending on the terms and conditions of the particular Securities, amongst other potential consequences, the terms and conditions of your Securities may be adjusted, the underlying asset may be substituted, or the Securities may be exercised early at the non-scheduled early repayment amount. Such amount may be less than your initial investment and you could lose some or all of your investment. • The performance of indices is dependent upon many unpredictable factors, including in relation to its underlying components. • You may receive a lower return on the Securities than you would have received from investing in the components of the index directly because the index level may reflect the prices of such index components without including the value of dividends paid on those components. • The sponsor of an index may take any actions in respect of the index without regard to your interests as holders of the Securities, and any of these actions could negatively affect the value of and return on the Securities. • If the sponsor of an index does not obtain its required authorisation or registration or such authorisation is suspended or removed, the Securities may be subject to early redemption and, in such case, you may lose some or all of your investment. • Your Securities may be adjusted or redeemed prior to maturity due to a change in law. SECTION E – THE OFFER

E.3	Terms and conditions of the offer	<p>An offer of the Securities may be made other than pursuant to Article 3(2) of the Prospectus Directive in the Republic of Portugal ("Public Offer Jurisdiction") during the period from (and including) April 6, 2020 to (and including) May 5, 2020 ("Offer Period") by the Authorised Offeror.</p> <p>The Offer Price is 100 per cent. E.7	Estimated expenses charged to the investor	The Issue Price of 100 per cent. (100%) of the Aggregate Nominal Amount includes a selling commission of up to 3.00 per cent. (3.00%) of the Aggregate Nominal Amount which has been paid by the Issuer.
